Waterboy Check List For Getting Your Irrigation Design Done

1. The sketch of your yard **does not** have to be to scale. Grab a blank 8.5" x 11" page and start to sketch.
2. Make sure that all the measurements of all the areas you want irrigated are labelled.
3. If there is something situated in the area that you do not want to irrigate (eg. a shed, playhouse etc.). We would need to know where it is located.
4. What size is the water supply? ½" or ¾"
5. Is your outside tap a frost free tap or a regular tap? Regular tap meaning that you can unthread it. A frost free tap is recessed back into the house and cannot be removed. And if you are not sure you can always take a picture.
6. Once your sketch is complete you can e-mail it to us or drop it off. If you e-mail please make sure you add your name and number so that we can contact you if we have any questions. Please email to: sales@waterboy.ca

If you have **any questions** please contact us we are always happy to help!!!!
